**press\*release \_ 003 - 21**

### **Registrations are open for the Youth European Championship in Pila (Vd'A)**

The registrations for the European Youth Championship of Mountain Bike are officially open, from Friday 18 April, which, in the week from 28 June to 3 July, will assemble a puzzle of colored jerseys of athletes that will paint the Pila basin (Valle d'Aosta), in an entire week of competitions which for the third year will be held in Valle d'Aosta. An event strongly desired and which, for the 2021 edition, will still be forced to deal with the health emergency, and which required a further great organizational effort by the organizing association, the Pila Bike Planet.

In fact, the impossibility of welcoming family members, friends and the public, who will not be able to personally support the athletes of the event that will attract 600 Under 14 and Under 16 to Valle d'Aosta, representing about thirty nations, is already outlined as probable. The organizational machine, however, did not give up and, in the uncertainty of what the health emergency will be at the end of June, is working to prepare the most rigid protocols so that the entire competition area and logistic sites are included in the so-called 'bubble': all athletes and professionals must show, upon arrival in Pila, a negative swab report, test carried out in the previous 72 hours. A further effort by the organizing committee will ensure that, to allow everyone to experience, albeit at a distance, the emotions, the fatigue of the kilometers of dirt road ground by "fat wheels" and the competitive atmosphere of the competition, the event will be available also live online.

The live streaming will be organized by IN VD'A, a company active since 2007 in the audio and video sector. The images will be a showcase for the Aosta Valley and will offer the opportunity to discover the trail network of Pila Bikeland, the offer of trails for mountain bikes, e-mtb and downhill, reachable, in 'normal' conditions, by cable car from Aosta, in just eighteen minutes. Emotions will travel in the ether even to those who will not be able to participate in the event, thanks to drone shooting.

It will instead be the task of the Top Italia Radio broadcaster - in collaboration with Done Wifi, which will allow live streaming - to follow the event day after day, starting with a real radio countdown of the event. Thanks to a direct line with the organizing machine, the broadcaster will offer a rich schedule of interviews, details of the race and real-time updates for all fans.
